

# **Pseudospherical tori with singularities**

*Shoichi Fujimori (Okayama University)*

Wed 9/01/2019, 14:15–15:15, Dissertantenzimmer (8th floor)

In this talk, we give a construction for pseudospherical tori, that is, constant negative Gaussian curvature tori, with one family of planar curvature lines in Euclidean 3-space. We also discuss the singularities of these tori.
